Dear Mr. Trant, ^{5/9}

RINGMORE: Wall painting

Thank you for your letter of 27th August, and enclosures. Your application for an Archdeacon's Certificate will probably come before the next meeting of the DAC (28th September) and I am asking Dr. Brooks to check the schedule of work to be done, which you have sent me.

With regard to Dr. Brooks giving a talk to your local Historical Society, I think it would be best if you wrote direct to him - I know that he has many commitments, as he is Head of the Department of English at Exeter University and also sits on many committees, of which the DAC is one. His address is: 48 Park Street, Crediton, Devon, EX17 3EH tel: (036 32) 3294. I am sure that he would be pleased to talk to your Society, if he could fit it in.

Yours sincerely,

Maureen R Bethel

Dear Miss Bethel,

Ringsmore All Hallows.

Thankyou for your letter of
18 March. I should have acknowledged it
earlier but Easter (and Spring) came upon us.

I haven't heard anything more from Chris
Brooks but I know how busy he was and how minor
this particular query must appear - so please
don't 'chivvy' severely!

Your letter reminded me that I also deserve
to be chivvied in my turn. Reverting to my
letter of 22 October last, I told you that I
had written to Luke Dampney. Mr. Jamieson did
reply and I should have passed this on to you
at once but somehow did not. Mea culpa..

I enclose photo-copies of his letter and
enclosures and do hope that these are clear
to the experts.

Yours sincerely

R. G. Trant.

15th January 1991

Ringmore Church. Single window rear of Organ.

Dear Sir,

With regard to fitting ventilation into this window, the opening is only 8½" in width and being so narrow the smallest section metal casement would leave little opening space. The alternatives are.

- (A) a small section set in a slot that can be lifted to open
- (B) Louvred with blades of glass set into rebates.
- (C) a hopper type casement made in lead on the same principal as metal but it would be only approx 1/2" in width to give a much larger opening.

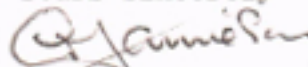

The size could be from 3" up to 10" probably, in height.

We have been quoted £80 for a metal casement, we can make the lead casement for £20: we hope this will be of help to you please let us know if further information is required.

Apologies for the delay.

Enclosed is illustration of type of casement which would be used in transept.

Yours sincerely

Luke, Dampney & Co

22 October 1990.

Dear Miss Bethel,

All Hallows, Ringsmore.

Thankyou for your letter of 13 October. I have written to Luke, Dampney, quoting the third paragraph of that letter and asking for an exact description of the proposals. I hope that this will clear the DAG's point; I have passed the specifications for the plaster and mortar to our builder.

Thankyou too for your kind remarks about my note on the Conference. I was somewhat taken aback by the Archdeacon's proposal that I should write something (in a very short time too) but I am glad it was acceptable.

May I now raise two different points - if you ought to have separate letters, I apologise and hope you don't mind. One is fairly simple and must have been raised elsewhere. Most churches have lists of their incumbents hanging somewhere; I have noticed that many of these have little room for more entries- and with the increasing mobility of the clergy, these will become more frequent. We here have no room for our present incumbent's name. Has the DAG any general advice on this? Do we try to copy the previous style and have a second board or should we start again with a larger 'canvas', from the beginning and leaving much more room for the future than our forerunners left us?

The second point is the one I mentioned at Abbotstbury. Two years ago, I came across banners of the four Evangelists rolled up in a blue fertilizer bag in our tower room. This did not seem to be the best storage place; Michael Swanton and Marion Glasgow from the University were measuring the church at the time and agreed that plastic was not the best cover so I have them at home at the moment, rolled on their staves.

I enclose a photograph of them on blue. Each measures 36 1/2" x 44 1/2"; the material is "Crocketts Original Leather Cloth West Man" and naturally the paint is suffering from what I suppose could be called craquelure in some circles. Has the DAG advice on the treatment which might be given and how they banners should be stored?

Yours sincerely

R. C. Trant
Churchwarden.

18 October 1990.

Dear Sirs,

Ringmore Church.

I wrote to you on 21 July 1989 about the work recommended by our architect to increase the airflow through the church and we have spoken on the telephone since.

The parish has now to apply for an Archdeacon's Certificate for this and other works required to remedy dampness in the chancel arch and, in communication with the DAC, I used the following phrase from the architect's recommendations :-

"2. Insertion of a small casement in the north transept window and of louvre framed glass in the north chancel window to increase the airflow through the church."

The DAC have agreed in general with our application but they questioned my wording of "louvre framed glass". I am told that one member of the committee has since clarified this point "by explaining that he had understood that ventilation was to be achieved by the insertion of "hoppers", which are technically described as bottom-hung, inward-opening small lights. This would be acceptable to the DAC".

I have therefore been asked "if this is what is going to be done or whether there was some reason for using another another type of opening (if indeed the "louvre framed glass" does refer to another type) ?."

I shall be most grateful if you can help me on this. I do not think that the tiny window in the north chancel would take a "hopper" even if a small one; I have never been very sure that this window could take anything much, but assumed that experts would know of something which would do. Can you word your proposals to satisfy the DAC ?.

Yours sincerely

R. G. Trant
Churchwarden.

Dear Mr. Trant,

RINGMORE: Chancel arch wall-painting

At last I am able to reply to your letter of 29th August, with which you enclosed the schedule of proposed minor preliminary works to remedy the dampness now affecting the wall-painting.

Your letter and schedule came before the meeting at the end of September. Dr Brooks was unfortunately unable to be present and the Committee questioned the description under para 2 "louvre framed glass" to be inserted in the north chancel window.

I have now been able to speak to Dr. Brooks, and he clarified this point by explaining that he had understood that ventilation was to be achieved by the insertion of "hoppers", which are technically described as bottom-hung, inward-opening small lights. This would be acceptable to the DAC. I wonder whether, therefore, you would be kind enough to let me know whether this is what is going to be done, or whether there was some reason for using another type of opening (if indeed the "louvre framed glass" does refer to another type) ?

There was one further suggestion from Dr Brooks and the Committee and that was that when the modern render on either side of the chancel arch has been removed (and time allowed for drying out if this should appear to be advisable) - the replastering should be done with lime-based plaster to the specification recommended by our architects. I enclose the relevant sheet from our 'guidelines' which gives the specification for the builder to use. A specification for mortar mix for re-pointing is also given in these guidelines. It does not cause damage to old stonework the way harder cement mixes do.

Finally, I have never yet written to thank you for the very nice appreciation of the Churchwardens' Day Conference at Abbotsbury which you wrote for Diocesan News. It was much appreciated at this end. We have just held a second conference for the North Devon deaneries - today - which also seems to have gone well.

Please don't hesitate to get in touch with the Committee if there are any problems over the work. We will await the application for an Archdeacon's Certificate now.

Yours sincerely,

Maureen R. Bethel

Non. Secretary

SCHEDULE

Minor preliminary works to remedy dampness affecting wall painting on chancel arch

1. Replacement of gutters on south east chancel wall (the then existing guttering was brought down by gales since this work was recommended) and repointing of masonry joints then hidden by the guttering.
2. Insertion of a small casement in the north transept window and of ~~louvre-framed glass~~ in the north chancel window to increase the airflow through the church.
3. Removal of modern render on either side of chancel arch below the wallpainting.

Insert "a hopper type casement made in lead"

Dear Mr. Drowley,

Ringmore

As requested, I enclose application forms for Archdeacon's Certificate.

These forms should be completed and returned to me in due course together with :-

- (a) A copy of the Parochial Church Council resolution approving the works.
- (b) Detailed specifications and plans of the same.
- (c) A cheque for the lodging fee of £16.10

I will then forward the papers to the Diocesan Advisory Committee for their views and then to the Archdeacon.

Yours sincerely,

FACULTY JURISDICTION MEASURE 1964

DIOCESE OF EXETER

QUESTIONS

(To be answered by the Applicants. Some questions may be irrelevant, especially if the application is for purposes other than works they may be left blank or answered with a simple negative)

1. What is the approximate age of the Church or building?
2. Is an architect employed or to be employed? If so state his name and enclose any report made by him as to the present condition of the church or building and as to the proposed work.
3. Give the name and address of any builder organ builder worker in stained glass bell founder or other artist craftsman or contractor to be employed.
4. Has the approval of the office in which the church or building is insured against fire been sought? If so a copy of their approval or reply should accompany the application.

Note* An answer is required only when alterations to heating or lighting are involved (including installation of organ blowers).

5. State the period estimated for the completion of the proposed work.
6. Has any previous Faculty or Licence or Certificate been issued or sought affecting the proposed work or purposes? If so give particulars of the Faculty Licence or Certificate.
7. If there is a lay rector has his consent been obtained?

Note: An answer is required only when the work affects the chancel and any consent should accompany this application.

FORM NO. 2

DAG/T.14.2/88.370

Dear Miss Bethel,

Ringmore All Hallows
Chancel Arch wallpainting

I wrote to you on 11 February 1989 about the preliminary work which should be undertaken around the church because of the dampness of the wall of the chancel arch, and enclosed a copy of Mr. Barnaby's report. On 12 April 1989, Dr. Brooks telephoned me to say that the Chairman and other members of the DAC had discussed the report and thought that the recommendations were an extremely sensible programme. He gave me the names of firms and made suggestions as to the internal plaster to be used.

My PCC has approved our going ahead and I am tackling the paper work for a Archdeacon's Certificate; in accordance with para. 3 of the Application - Form No.1, we need the DAC cover in writing for the works and I therefore enclose my drafts for the Schedule to Form 1 and the answers to the questionnaire. I hope that these are satisfactory and that the approval of the DAC can be given.

Yours sincerely

R. C. Trant.

Dear Mr. Trant,

RINGMORE: Window ventilation; banners; incumbents board

Thank you for your letter of 31 March, which was considered at the end of April meeting.

The Committee is in favour of alternative C in Messrs.Luke Dampney & Co's letter, i.e. the hopper type casement made in lead, which Dr. Brooks discussed when he made his site visit.

Dr. Brooks has assured the committee that he will advise you about the banners and the incumbents board - he is extremely busy just now at the end of the University year, but if you don't hear from him within, say a month, perhaps you would give him a call or drop him a note before the start of the Vacation.

Come back to us if you have any queries.

Yours sincerely,

Maureen R. Bethel

Date: 22 OCTOBER 2003

Please return to the:-

Tree & Wildlife Officer

Planning Services Group
South Hams District Council,
Follaton House, Plymouth Road,
Totnes TQ9 5NE

Please cut off application form and keep the notes across for your reference.

Have you:- Included any supporting documents?

Trees in a
CONSERVATION AREA

*Notes to help you complete your notification
of proposed works to trees in a Conservation Area*

General guidance on the protection afforded to trees growing in Conservation Areas is given over the page. If you are unclear on whether you need to serve notice, or would like to talk to someone before serving notice, please contact

The Tree and Wildlife Officer

by phoning

01803 861234 ext. 525

You don't have to use this standard form but it's been prepared to ensure that all relevant information is submitted to aid a speedy response.

You need to submit only **one** copy of your notification form but are strongly recommended to retain a copy yourself for future reference as any approval will refer to details you give on the form and plan. The form should be accompanied by a plan which is of sufficient scale and accuracy to clearly show the location of the tree(s).

You may wish to seek specialist advice in relation to your notification and you may submit a tree surgeon's report as a supporting document.

A Guidance Note on the management of protected trees is available from the Council.

The following refer to the numbered questions on the notification form.

- 1 An **agent** is anyone, such as a tree surgeon, working on your behalf. All correspondence will be sent to your agent if you have one.
- 2 Use this section to clarify whether you are serving a notification or seeking an exemption.
 - A **notification** goes through the normal process of assessment by the Council.
 - An **exemption** can be granted for works detailed as exempt in the Town and Country Planning Act, as summarised over the page. You may wish to seek specialist advice on this matter.

The Conservation Area will be identified using the name of the town or village in which the tree is growing.

- 3 Although you can apply to work on a tree not in your ownership it is appropriate for the Council to know details of **ownership**.
- 4 The notification
 - Trees: These should be detailed by **species**
 - Number: These should allow **ready identification** on the plan
 - Proposed operations: If you want to carry out work other than felling (for example crown thinning, crown reduction or crown lifting) you need to **describe these accurately** in order that they can be properly assessed. Unclear notifications will not be accepted.
 - Reasons: Please specify the **reasons** for wishing to undertake the works.
- 5 Show clearly the **location of the tree(s)** in this space or on an accompanying plan.
- 6 Where certain felling takes place there is a requirement to **replant**. Please specify the species of your intended replacement planting and its location. It should be in the same place unless the Council agree otherwise.
- 7 When you have completed the form, please sign and date it and return it to the address given.

Summary of the Legislation relating to Trees in a Conservation Area

*These notes are for guidance only and give a brief summary of the legislation.
The notes have no legal force.*

Scope of the Legislation

The legislation sets out a process whereby trees in Conservation Areas can only be worked on or felled once the local planning authority (the Council) has been able to consider the works.

The Need to Notify

Under Section 211 of the Town and Country Planning Act 1990, anyone proposing to cut down, top, lop, uproot, or carry out works liable to damage or destroy a tree in a Conservation Area is required to give six weeks notice of their intention to the Council before starting work. The purpose of this provision is to give the Council an opportunity to consider the proposed works and if necessary serve a Tree Preservation Order to control the works.

This requirement does not apply in the following circumstances which are known as 'exempt works':-

- (i) trees which are dead, dying or have become dangerous;
- (ii) trees which do not exceed 75mm in diameter measured at 1.5m above ground level;
- (iii) where the works are necessary for the prevention or abatement of a nuisance (nuisance is to be taken in its legal sense and does not mean mere inconvenience).

Except in an emergency, the Council should be given not less than 5 days notice that operations detailed as exempt in i, ii and iii are to be carried out to allow the situation to be verified on site.

Decisions

When the Council receives Notice of Intention to carry out works, it has three options open to it.

- (i) Make a Tree Preservation Order to prevent works;
- (ii) Decide not to make a Tree Preservation Order and inform the applicant that work can go ahead;
- (iii) Do nothing within the six week period, at which point the proposed work may go ahead.

Replanting

If a tree in a Conservation Area is removed, uprooted or destroyed in contravention of section 211, the landowner is placed under a duty to plant another tree of an appropriate size and species at the same place as soon as he reasonably can. The same duty also applies if a tree is removed, uprooted or destroyed or dies at a time when work on the tree is authorised because it is dead, dying or dangerous, or because it is causing a nuisance.

Contravention

Any person failing to notify the Council in writing as set out above is guilty of an offence and liable on summary conviction to a fine not exceeding £20,000.

Dear Yvonne,

Please could you give me the name and address of the man who restored the dial

at ?Woodleigh. I would like to write to him to ask him what methods he used as I have been

asked to restore another 17th c. slate dial in north Devon. It would be good to

compare methods.

Hope all is well in Ringmore.

Best wishes

Harriet
